

SupplyPad

RUGGED TABLET FOR MOBILE INVENTORY CONTROL

MANAGE UP TO 3,000 SKUs

SupplyPad® from SupplyPro® provides mobile materials control for barcoded materials wherever they are located at your facility. SupplyPad includes all of the reporting capabilities of SupplyPro's industry-leading SupplyPort™ software in a handheld device. SupplyPad's device software supports all of our normal functionality including kitting and order-based fulfillment.

WIRELESS INTERNET CONNECTION OR NOT, WE'VE GOT YOU COVERED

If your facility has a wireless network the SupplyPad uploads transactions as the unit is carried from location to location. If a wireless network is not available, the device records all of the transactions and uploads them as soon as the device is returned to the docking station.

BARCODE CONTROL

SupplyPad features the ability to track the use of barcoded items. Check-in/check-out is as simple as a quick scan. The device automatically logs who used the materials with applicable time limits and allocation codes, if desired.

TAKE IT ON THE GO!

Bring control to multiple facility locations with one device or use the industrialized docking station available for mounting the SupplyPad.

SPECIFICATIONS

- 8.07" H x 11.57" W x .98" D | (205mm x 294mm x 25mm)
- 10.4" screen (264mm)
- 1024 x 768 XGA Resolution
- 2.2 lb / 1.1 kg
