Introducing SupplyController™ The Cutting-Edge Replacement for SupplyLink® by SupplyPro

FOR IMMEDIATE RELEASE

SAN DIEGO, CA (PRWEB) August 8, 2023 - SupplyPro, a leading provider of inventory management solutions, is thrilled to unveil its latest innovation, the SupplyController. Designed to revolutionize it's SmartDrawer® system, the SupplyController is set to replace the SupplyLink, elevating efficiency and functionality.

SmartDrawer: Powered by SupplyController

The SupplyController for the SmartDrawer is a game-changer, with three key components that redefine the standards of supply management:

1. Universal Control Module (UCM): The heart of the SupplyController, the UCM is an electronics powerhouse placed in the first 3" locking drawer of the SmartDrawer and SupplyScale® main cabinets.

   Supporting auxiliary power, SupplyScale, and SupplyLock®, the UCM's Intel quad-core Atom E3845 processor and Windows 10 operating system ensure unparalleled performance. With IP-22 certification for industrial environments, dust-proof, and shock and vibration-proof construction, the UCM is a robust solution for any industrial setting.

2. Industrial Touchscreen Monitor: Experience seamless navigation with the SupplyController's 17" Industrial Touchscreen monitor. Offering 1280x1024 resolution and a contrast ratio of 350:1, the monitor delivers crisp, clear visuals for an intuitive user experience. Its versatile standalone or VESA mounting options provide flexibility in deployment.

3. Keyboard with Mouse Pad: The rugged and compact keyboard with a 10-key numeric keypad, 20 function keys, and a responsive mouse pad ensures effortless input and control for users, streamlining their interactions with the SupplyController.

SupplyController EXT: The field retrofit for any existing SupplyLinks

To replace an existing SupplyLink, SupplyController EXT fits on top of the SmartDrawer cabinet with a 3" high enclosure. The SupplyController EXT offers a seamless transition for users. Designed to cover the entire top of Lista (28.23" W x 28.54" D) and/or Rousseau (30" W x 27" D) cabinets, the enclosure accommodates auxiliary boxes and power supplies, making integration hassle-free.

SupplyPro VIM: A Virtual Inventory Management Solution

SupplyPro VIM, allows administrators to efficiently assign or customize storage locations and manage up to 2,000 items per VIM module, and access key product characteristics and features virtually. With standard SSIS reporting, ordering, and business rules, SupplyPro VIM is a comprehensive solution for efficient inventory control.

"At SupplyPro, we are dedicated to pushing the boundaries of innovation, and the SupplyController is a testament to that commitment," said Floyd Miller, CEO at SupplyPro. "This cutting-edge solution will deliver streamlined inventory management, enhanced user experiences, and increased productivity."
