

SupplySystem SBD IV

COMPARTMENT LEVEL
CONTROL WITH
PICK-TO-LIGHT TECHNOLOGY

Single Box Dispenser (SBD IV) is the solution to manage mission critical inserts and everyday small tooling in discrete compartments. The SBD IV reduces consumption and waste, providing additional control for inventory management.

SBD IV DELIVERS

Flexible design

- Modular design allows SBD IV storage units and traditional storage units to be combined in a single drawer
- SBD IV cartridges support multiple insert package sizes

Quick and Easy Access

- Rapid refill reduces stocking time
- Quick login process, product selection, product retrieval and logout for users
- See-through storage cartridges

High Density

- Narrow, single depth rack: 60 compartments
- Wide, double depth rack: 240 compartments

FEATURES

- Simple and easy-to-use patented Pick-to-Light technology
- Strategically load inserts to restrict access to specific users, avoiding distribution of incorrect insert sizes
- Integrates standard SupplySystem technology and insert package control in a single system design

FEATURES	SBD IV
Number of SKUs	60*
Redundancy	Yes
Serviceability	Simple
Technology	Electronic

* Narrow rack single depth = 60 locations
Narrow rack double depth = 120 locations

Wide rack single depth = 120 locations
Wide rack double depth = 240 locations

SPECIFICATIONS

- Compatible with SupplySystem 7.5" drawers
- 2 trays per drawer storage unit | 30 cartridges per tray
60 cartridges per narrow single depth rack drawer storage unit
- Internal cartridge dimensions: 5.10" H x 2.36" W x .75" D
(129.6mm H x 60mm W x 19mm D)

Inventory automatically adjusted after the item has been taken and the cartridge is released

APPLICATIONS

- Insert Boxes
- End Mills
- Reamers
- Drill Bits
- Taps
- Allen Wrenches
- Locks
- Keys
- And many more!
